

International Avionics Service, the Netherlands, has received three different EASA approvals for the installation of Garmin GTX330D Mode S transponders in Cessna Citation 525s.

International Avionics Service (I.A.S.) received the EASA approvals for the change of the three different types of avionics stacks in the Citation 525 and Citation 525A. According to **Vincent Wigmans** of I.A.S., this is a less expensive solution for Cessna.

I.A.S. already has installed 16 transponders in European-registered airplanes.

For more information, contact International Avionics Service at 31-10-4371038 or visit www.iasnl.com.
